SELECTED FINANCE PROJECTS

ORION CORP. – VALUATION & BUY-SIDE INVESTMENT MEMORANDUM

- Built an integrated FCFF valuation model using DCF, Trading Comps and Reverse DCF, linking operating assumptions to enterprise and equity value.
- Prepared a buy-side investment memorandum synthesizing business model, historical performance, scenario forecasts, valuation, key risks/catalysts and market-implied expectations using public filings and sell-side research.
- Developed a market-calibration dashboard to identify the operating assumptions responsible for the gap between intrinsic value and market expectations.

K-REITS RISK PLATFORM

- Built a REIT underwriting platform integrating DART and ECOS data to analyze NAV, FFO, leverage and interest-rate/cap-rate stress scenarios.
 - Rebuilt property-tax analysis from top-down balance-sheet estimates to bottom-up asset-level underwriting using property registry, assessed-value and tax-rule data, improving auditability of assumptions.

K-APT AX CONTROL TOWER

- Analyzed management-fee data across 3,382 apartment complexes, building a 6-page Power BI dashboard with 49 measures to flag anomalous spending patterns.
 - Automated review requests and exception handling through Power Automate and a human-in-the-loop workflow, requiring contract and bidding-document validation before conclusions were finalized.
